QUALITY ASSURANCE SURVEILLANCE PLAN (QASP) FOR

1.0 PURPOSE

This Quality Assurance Surveillance Plan (QASP) is a Government developed and applied document used to make sure that systematic quality assurance methods are used in the administration of the Performance Based Service Contract (PBSC) standards included in this contract. The intent is to ensure that the Contractor performs in accordance with performance metrics set forth in the contract documents, that the Government receives the quality of services called for in the contract and that the Government only pays for the acceptable level of services received.

2.0 AUTHORITY

Authority for issuance of this QASP is provided under FAR 52.212-4(a), Inspection/Acceptance, which provides for inspections and acceptance of the articles, services, and documentation called for in the contract to be accomplished by the Contracting Officer or his duly authorized representative.

3.0 SCOPE

The Contractor, and not the Government, is responsible for management and quality control actions necessary to meet the quality standards set forth by the contract. The Quality Assurance Surveillance Plan (QASP) is put in place to provide Government *surveillance* oversight of the Contractor's quality control efforts to *assure* that they are timely, effective and are delivering the results specified in the contract. The QASP is not a part of the contract nor is it intended to duplicate the Contractor's Management Plan. The Government may provide the Contractor an information copy of the QASP as an Attachment to the solicitation to support the Contractor's efforts in developing its plan for maintaining the levels of quality anticipated to be delivered under the terms of the contract.

4.0 RESPONSIBILITIES

The Government resources shall have responsibilities for the implementation of this QASP as follows:

Contracting Officer – The Contracting Officer ensures performance of all necessary actions for effective contracting, ensures compliance with the terms of the contract and safeguards the interests of the United States in the contractual relationship. It is the Contracting Officer that assures the Contractor receives impartial, fair, and equitable treatment under the contract. The Contracting Officer is ultimately responsible for the final determination of the adequacy of the Contractor's performance.

Task Order Manager (TOM) - An individual designated in writing by the Contracting Officer to act as his authorized representative to assist in administering a contract. The source and authority for a TOM is the Contracting Officer. TOM limitations are contained in the written letter of appointment.

5.0 METHOD OF QA SURVEILLANCE

The below listed method of surveillance shall be used in the administration of this QASP. The QASP Matrix, describes the method of surveillance that may be used to monitor the services and deliverables to be provided under the contract.

Government Representative to Monitor – A Government Representative will randomly monitor the Contractor's performance. The TOM will conduct the random monitoring.

----------------------------------	---	----------------------------------	------------------	-------

The PBSC items that have been identified for surveillance are identified in the Performance-Based Matrix.

7. DOCUMENTATION

The TOM will, in addition to providing documentation, maintain a complete Quality Assurance file. The file will contain copies of all reports, evaluations, recommendations, and any actions related to the Government's performance of the quality assurance function. All such records will be retained for the life of this contract. The TOM shall forward these records to the Contracting Officer at termination or completion of the contract.

For each item that does not meet acceptable levels, the Government may issue a Contract Discrepancy Report (CDR). CDRs will be forwarded to the Contracting Officer with a copy sent to the contractor. The contractor must reply in writing within 5 days of receipt identifying how future occurrences of the problem will be prevented. Based upon the contractor's past performance and plan to solve the problem, the Contracting Officer will determine if any further action will be taken.

MEASURABLE PERFORMANCE

The contractor shall be measured in performance using the factors of Quality, Timeliness, and Responsiveness. Within these factors the contractor shall be rated using various elements applicable to each of the factors. For example the Quality factor shall focus on the contractor's ability to satisfactorily meet the customer's expectations of completed work. How many deficiencies were found or instances of rework were required are the types of things that shall be examined. On time delivery of products, status reports, invoicing, and adherence to schedules shall impact any review of Timeliness. Responsiveness shall be concerned with how well the contractor responds to customer concerns and the approach used to resolve problems.

Also, contracting officers shall not issue modifications that would create retroactive changes to payment instructions. All payment instruction changes shall be effective as of the date of the modification. that the resulting reduction of productive effort would be so substantial as to impair the successful completion of the contract or the service order, the Contractor may be terminated by the Contracting Officer for default or for the convenience of the Government, as appropriate, or, at the discretion of the Contracting Officer if he finds the Contractor at fault for the condition, the contract price or fixed fee may be equitably adjusted downward to compensate the Government for any resultant delay, loss or damage.

INFORMATION ON EXPOSURE TO HAZARDOUS MATERIAL

As required by 29 CFR 1910.1200, The Hazard Communications Standard, the shipyard must inform you (as a contractor employer with employees working in the shipyard) of the hazardous materials used at the Shipyard which your employees may be exposed to while working here and also to suggest appropriate protective measures. This section informs you as required. Your own responsibilities as an employer, if any, are given in 29 CFR 1910.1200.

1. Hazardous materials your employees may be exposed to. Hazardous materials are materials which are cancer causing agents, toxic or highly toxic agents, reproductive toxins, irritants, corrosives, sensitizers, liver toxins, kidney toxins, agents which act on the blood forming system, and agents which damage the lungs, skins, eyes or mucous membranes. There are many potentially hazardous chemicals present at Portsmouth Naval Shipyard which, unless controlled properly, could present a safety and health problem. The presence of many potentially hazardous materials may be apparent from the manufacturer's warning label on the hazardous material containers. These hazardous materials range in type and quantity. Typical hazardous materials are:

- a. Metals, e.g., mercury, lead, chromium
- b. Solvents, e.g., disinfectants, cleaning and polishing compounds and preparations, dopes, thinners, flammable inks.
- c. Paints and adhesives, e.g., varnishes and related products, sealing compounds, asphalt, deck and floor coverings, deck compounds.
- d. Corrosives, e.g., acids, alkalis
- e. Compressed and liquefied gas, e.g., nitrogen, argon, oxygen, acetylene
- f. Lubricants and oils, e.g., greases, cutting oils, hydraulic oils, miscellaneous waxes and fats
- g. Fuels, e.g., liquid propellants, fuel oils, oxidizers, solid fuels
- h. Particulates, e.g., asbestos fiberglass, dust, fumes, mist

Depending on the material involved, materials such as these can present physical hazards and or health hazards. The presence of many potentially hazardous materials may be apparent due to their physical characteristics, such as the visual appearance of abrasive blasting dust or the distinctive smell of many solvents.

2. Labeling of Hazardous Material. Containers of potentially hazardous chemicals bear manufacturer's labeling, which identifies the chemical and its manufacturer, and provides appropriate hazard warnings. In addition, some materials may be labeled with the National Protection Association (NFPA) 704 label. This label uses a system of color coded symbols and numbers to convey the potential hazard of the material. The contractor should obtain information from NFPA concerning the interpretation of the 704 label.

3. Material Safety Data Sheets (MSDS). The Occupational Safety and Health Office at the shipyard maintains copies of manufacturers' Material Safety Data sheets for potentially hazardous chemicals/materials that are known to be present in the shipyard. The contractor may, upon request to the Occupational Safety and Health Office, review Material Safety Data Sheets for any specific materials to which contractor employees may be exposed while performing work in the shipyard workplace. This information may be reviewed in the Occupational Safety and Health Office.

4. Appropriate Protective Measures. Exposure to potentially hazardous material may occur from inhalation, ingestion or skin contact with the material: therefore, the following precautions should be taken:

- a. Obey signs, directions and warning labels;
- b. Do not use unknown or labeled materials;
- c. Only operate shipyard equipment that you are authorized to operate, familiar with, and

qualified to

- operate;
- d. If any health effects (skin rash, trouble breathing, etc.) occur, which you feel are caused by exposure to shipyard hazardous material, contact Code 106.1.

For specific information on any hazardous material contact Code 106.1, Building 22, phone (207)438-2001, Portsmouth Naval Shipyard, Portsmouth, NH 03801-5000.

(e) Contracting restrictions. [Check the restrictions that apply]

(1) To the extent the contractor provides systems engineering and/or technical direction for a system or commodity but does not have overall contractual responsibility for the development, the integration, assembly and checkout (IAC) or the production of the system, the contractor shall not (i) be awarded a contract to supply the system or any of its major components or (ii) be a subcontractor or consultant to a supplier of the system or of its major components. The contractor agrees that it will not supply to the Department of Defense (either as a prime contractor or as a subcontractor) or act as consultant to a supplier of, any system, subsystem, or major component utilized for or in connection with any item or other matter that is (directly or indirectly) the subject of the systems engineering and/or technical direction or other services performed under this contract for a period of three years after the date of completion of the contract. (FAR 9.505-1(a))

(2) To the extent the contractor prepares and furnishes complete specifications covering nondevelopmental items to be used in a competitive acquisition, the contractor shall not be allowed to furnish these items either as a prime contractor or subcontractor. This rule applies to the initial production contract, for such items plus a specified time period or event. The contractor agrees to prepare complete specifications covering non-developmental items to be used in competitive acquisitions, and the contractor agrees not to be a supplier to the Department of Defense, subcontract supplier, or a consultant to a supplier of any system or subsystem for which complete specifications were prepared hereunder. The prohibition relative to being a supplier, a subcontract supplier, or a consultant to a supplier of these systems of their subsystems extends for a period of [insert the period of prohibition] after the terms of this contract. The contractor agrees to prepare, support the preparation of, or provide material leading directly, predictably and without delay to a work statement to be used in competitive acquisitions, and the contractor agrees not to be a supplier or consultant to a supplier of any services, systems, or subsystems for which the contractor participated in preparing the work statement. The prohibition relative to being a supplier, a subcontract supplier, or a consultant to a supplier of any services, systems, or subsystems extends for a period of [insert the period of prohibition] after the terms of this contract. (FAR 9.505-2(a)(1))

(4) To the extent work to be performed under this contract requires evaluation of offers for products or services, a contract will not be awarded to a contractor that will evaluate its own offers for products or services, or those of a competitor, without proper safeguards to ensure objectivity to protect the Government's interests. Contractor agrees to the terms and conditions set forth in the Statement of Work that are established to ensure objectivity to protect the Government's interests. (FAR 9.505-3)

those companies (i) to protect such data from unauthorized use or disclosure so long as it remains proprietary and (ii) to refrain from using the information for any other purpose other than that for which it was furnished. Evidence of such agreement(s) must be made available to the Procuring Contracting Officer upon request. The contractor shall restrict access to proprietary information to the minimum number of employees necessary for performance of this contract. Further, the contractor agrees that it will not utilize proprietary data obtained from such other companies in preparing proposals (solicited or unsolicited) to perform additional services or studies for the United States Government. The contractor agrees to execute agreements with companies furnishing proprietary data in connection with work performed under this contract, obligating the contractor to protect such data from unauthorized use or disclosure so long as such data remains proprietary, and to furnish copies of such agreement to the Contracting Officer. Contractor further agrees that such proprietary data shall not be used in performing for the Department of Defense additional work in the same field as work performed under this contract if such additional work is procured competitively. (FAR 9.505-4(b))

(6) Preparation of Statements of Work or Specifications. If the contractor under this contract assists substantially in the preparation of a statement of work or specifications, the contractor shall be ineligible to perform or participate in any capacity in any contractual effort (solicited or unsolicited) which is based on such statement of work or specifications. The contractor shall not incorporate its products or services in such statement of work or specifications unless so directed in writing by the Contracting Officer, in which case the restrictions in this subparagraph shall not apply. Contractor agrees that it will not supply to the Department of Defense (either as a prime contractor or as a subcontractor) or act as consultant to a supplier of, any system, subsystem or major component utilized for or in connection with any item or work statement prepared or other services performed or materials delivered under this contract, and is procured on a competitive basis, by the Department of Defense with one (1) year after completion of work under this contract. If the contractor provides AAS services as defined in paragraph (d) of this clause, it shall be ineligible thereafter to participate in any capacity in Government contractual efforts (solicited or unsolicited) which stem directly from such work, and the contractor agrees not to perform similar work for prospective offerors with respect to any such contractual efforts. Furthermore, unless so directed in writing by the Contracting Officer, the contractor shall not perform any such work under this contract on any of its products or services, or the products or services of another firm for which the contractor performs similar work. Nothing in this subparagraph shall preclude the contractor from competing for follow-on contracts for AAS.

(f) Remedies. In the event the contractor fails to comply with the provisions of this clause, such noncompliance shall be deemed a material breach of the provisions of this contract. If such noncompliance is the result of conflicting financial interest involving contractor personnel performing work under this contract, the Government may require the contractor to remove such personnel from performance of work under this contract. Further, the Government may elect to exercise its right to terminate for default in the event of such noncompliance. Nothing herein shall prevent the Government from electing any other appropriate remedies afforded by other provisions of this contract, or statute or regulation.

(g) Disclosure of Potential Conflicts of Interest. The contractor recognizes that during the term of this contract, conditions may change which may give rise to the appearance of a new conflict of interest. In such an event, the contractor shall disclose to the Government information concerning the new conflict of interest. The contractor shall provide, as a minimum, the following information:

- (1) a description of the new conflict of interest (e.g., additional weapons systems supplier(s), corporate restructuring, new first-tier subcontractor(s), new contract) and identity of parties involved;
- (2) a description of the work to be performed;
- (3) the dollar amount;
- (4) the period of performance; and
